and Laser Clinic and Woodbury Dental Practice

WHY YOUR DENTIST MAY BE YOUR IDEAL PARTNER NEXT TIME YOU CONSIDER FACE AND BODY AESTHETIC PROCEDURES!

RECORD numbers of consumers are now seeking out the latest in non-surgical facial and body rejuvenation procedures, which provide excellent results without many of the potential complications of more traditional invasive procedures.

In recent years laser technology has developed in leaps and bounds and many treatments now give fantastic results with little or no down time traditionally associated with these procedures.

Laser 360 protocol (Harmony laser Platform by Alma Lasers) is one such treatment that combines three revolutionary laser technologies to improve skin colour, texture and tone to give a revitalised look and firming lift to the face.

Cellulite can also be greatly reduced with Accent radiofrequency treatment, which gently targets cellulite to diminish its appearance and provide a slimmer smoother shape.

The newest generation of lasers used for hair removal is virtually painless and specially designed to remove unwanted hair faster, more comfortably, and with fewer visits. Soprano Pain-Free, Hair-Free™ treatment system's unique IN-Motion™ technology allows larger areas to be treated faster, many patients describe the sensation as soothing as a hot stone massage. A treatment previously popular mostly with women is gaining popularity amongst men who also wish to be free of unsightly excess hair without the discomfort of waxing and hassle of shaving.

This unprecedented demand for non-surgical rejuvenating treatments has led to many dental practices, which have been offering Botox and facial fillers for many years now, to expand their services to encompass these whole body treatments and provide a more holistic approach.

One such Clinic is Woodbury Dental Practice with onsite Laser Clinic where Dr Vadgama and his team pride themselves on providing the very best dental care and treatment in harmony with the latest non-surgical facial & body rejuvenation treatments.

Committed to excellence and providing a bespoke individual service tailored to your concerns in a welcoming atmosphere the clinic offers the latest state of the art dental technology which can be combined with non-surgical facial and body rejuvenation procedures to restore smiles, confidence and health.

The clinic offers comprehensive general dental care, cosmetic dentistry and implants, alongside which there is also a full range of non-surgical facial and body aesthetic treatments to choose from ranging from Botox and facial fillers to Laser360 skin resurfacing & tightening, Accent cellulite reduction and pain-free laser hair removal.
